Arguably some of the toughest in the world, the Mecalac range of compact Tandem Rollers are designed for the rigorous demands of the Plant Hire industry. With an 800mm drum the TV800 is

the smallest in the range of tandem drum rollers, perfect for small jobsites. Optional hydraulic

breaker outlet provides 30L/min flow rate (Category 2), removing the need for an additional

powerpack or compressor on site, further increasing the versatility of this compact model.
